

MINING, BUSINESS AND STOCKS

TODAY'S MARKET WAS AGAIN ACTIVE

General Trend Was Upward and Generally Healthy Tone Prevailed.

TOTAL SALES WERE LARGE.

Principal Sales Were in Lower Mammoth and Scottish Chief, With Bulk Of Sales in Utah Stocks.

Business on the floor of the local exchange opened up lively this morning. The bidding was brisk and active and a number of stocks gained a point or two during the session. The bulk of the trading took place during the regular call, and Utah stocks were as usual, the more popular. Lower Mammoth was quite active at 83 to 86 cents, something like 5,500 shares changing hands on the regular call and 1,300 on the open board. Scottish Chief let out 15,000 shares at from 12 to 13 1/2 cents.

During the session a total of 51,223 shares changed hands during the regular call representing a worth of \$18,475.50, while on the open board the total reached 7,110 shares representing a worth of \$8,147.45.

The quotations for the session closed as follows:

MOHAWK'S RICH ORE.

Ore in Bank Vaults Awaiting Shipment Worth \$25 Per Pound.

Lying on the table of the sub-bank of the State Bank & Trust company is a big chunk of ore from the Frances Mohawk lease, one side of which is covered with a gold that is purer than the coin itself.

In the vaults of the bank is piled 100 sacks which came from the same rich streak, opened first on the 220-foot level, and lately entered on the 275, where it measures a foot and a half across and carries \$25 in gold to the pound. This pile of ore is valued at \$150,000.

In the vault of the Cook bank is stacked another big row of double canisters containing even a greater treasure, which is to form a part of the million-dollar car that Hayes & Monette plan to ship under guard to the smelters. Besides these two, five other loads of rich ore are being shipped.

The true significance of the strike made by Hayes & Monette did not dawn on the public for many days. For one thing, the quake and fire at San Francisco demoralized everything for several weeks. The ore, too, was much more in grade than the since had opened up. Hayes & Monette, however, were confident of the future and unhesitatingly invested all the money they could get hold of. They are credited with a block now that means a big fortune. George Wingfield, too, was Johnny on the spot, and was kind enough to "wise" some of his friends as to the value of the Mohawk. It was the Wingfield purchase of Jim Forman's 20,000 shares that first awakened the public, and many a fortune has been made by daring operators since that day in July when new life was instilled into a lethargic market by the boldest plunger in Nevada.

On the entire capitalization of 1,000,000 shares in the Mohawk 200,000 shares are yet in the hands of the promoters and the shareholders. Of the 700,000 shares outstanding, Wingfield & Nixon are credited by a good authority with 400,000; Hayes & Monette, 60,000; Walter White, 100,000; and the other shareholders, 100,000, a total of 660,000 shares, leaving but 40,000 shares to be divided among the outside holders—Goldfield Tribune.

ACTIVITY AT UTAH APEX.

Tunnel Being Pushed Rapidly and Many Improvements Being Made.

At the Utah-Apex everything is lively. A large barn is being built to accommodate the horses. A pipe line is being laid up the mountain to the mine, and work will be immediately commenced on the aerial tramway which will carry the ore to the newly finished line in Carr fork, says the Bingham Press.

In the mine the long tunnel which is expected will tap the ore bodies at a distance of 3,000 feet from the mouth of the tunnel is being pushed rapidly ahead and is now in a little over 1,800 feet. A number of veins have been cut in the tunnel, which shows up good values.

The company has resumed ore shipments, which for some time had ceased. The shipping ore runs from 32 to 34 and some has been found running as high as 35 in gold. A recent shipment averaged 3 1/2 per cent copper and \$5.20 in gold and silver.

As soon as the concentrating mill in Markham gulch is completed the low grade ore will be freighted to the mill by team until the spur from the railroad is completed.

LA PLATA MINE LEASED.

A Boston Party Will Operate in Camp Near Logan.

Special Correspondence.

Logan, Oct. 28.—The directors of the La Plata Mining company decided to lease their property to Mr. Heald of Boston and the papers are now being prepared. The lease runs for two years and the owners are to receive proceeds from 20 percent of the ore taken out. Mining is high as \$25 in gold. A recent shipment averaged 3 1/2 per cent copper and \$5.20 in gold and silver.

H. C. Hansen is down from the Amazon and reports that work on that property has been suspended temporarily.

FEED BOWLER IN SALT LAKE

Well Known Nevada Mining Man Stops Over En Route From New York to Johnnie.

WILL NOT SELL MINNIE MAY.

Disposed of Over \$1,000,000 Worth of Property in New York of Prospectors And Others in Vicinity of Johnnie.

Fred Bowler, one of the best known characters in mining circles in the state of Nevada, arrived in the city yesterday from New York and is registered at the Wilson.

Mr. Bowler, who has his partner, Bab Atkinson, own the Minnie May mine, one of the richest gold producers in a section of rich mines. His mission in New York was for the purpose of interesting eastern capitalists in certain Nevada Mining properties, and in this he was peculiarly successful, having returned with a commission from C. S. Sessinger, Robert Purcell and others of New York to purchase the Johnnie Consolidated Gold Mining company for \$2,500,000.

Asked as to whether he would ever sell the Minnie May he replied emphatically, not while he and Bob Atkinson lived. While in New York, he claims to have disposed of over \$1,000,000 worth of properties held by prospectors and others in the vicinity of Johnnie.

Reports of fabulous richness have from time to time reached the outside world regarding the Minnie May mine, and last night Bowler avowed that he and his partner opened a vein on the property last night which runs 100,000 to the ton.

Be that as it may, Bowler is generally regarded as one of the richest of the recently successful Nevada mining men, and the entire absence of anything approaching a desire to sell on his part has strengthened the belief that the Minnie May is undoubtedly a very rich mine.

NOW READY TO SHIP.

Ohio Kentucky Company Waiting Only For Completion of Railroad.

According to a letter received at the local offices of the company from Supt. James Earls, the Ohio-Kentucky Mining company of Pioche, Nev., is now ready to begin shipping just as soon as the branch of the Salt Lake Route from Caliente to Pioche is ready to accept consignments.

The grading for the length of the 23 mile stretch is now completed, ties and rails have commenced to arrive and the completion of the line will now be rushed as rapidly as possible.

The new shaft house on the company's property is now completed and the gasoline hoist and other machinery is being installed. The timbering of the shaft has been completed to a depth of 50 feet.

At the depth of 200 feet it is expected that the shaft will tap a 30-foot vein of rich lead and silver ore which was developed some time ago by means of a tunnel abandoned. The ore will be shipped to the valley smelters and it is believed will go far towards relieving the scarcity of fluxing ore badly needed for the treatment of the silicious ores from Goldfield and other camps.

TO HAVE NEW PLANT.

Revenue Group in Beaver County to Be Put Under Heavy Development.

At a recent meeting of the board of directors of the Revenue Mining company, a campaign of development on a large scale was decided upon.

The company has been under development for some years past with good results, although but little has been heard from them except in a general way. The directors, however, are said to be highly satisfied with the progress which the company has been making. The company owns large claims and each of these is said to be mineralized to a greater or less extent. The center of the group is near the Cedar Mining company's ground and about 15 miles from the town of Newhouse.

The property is traversed by a system of contact between lime and porphyry and porphyry and quartzite while crossing these are numerous fissures. There are thousands of tons of ore running from \$17 to \$1,000, some assays showing still higher values.

The plans for the immediate installation of a concentrating plant in addition to other equipment and with in two months it is expected that the mine will be one of the steady contributors to the local market.

ABOUT NEVADA.

Resources of State From Mining Standpoint and Growth of Camps.

Profit and Loss for November will contain an article on the state of Nevada, from which the following is an excerpt:

Tonopah, the discovery of "Honest Jim" Butler, and the first of the new Nevada camps, is becoming quite staid, and proudly boasts that her industry is settling down to a substantial business basis. Tonopah has made good, and has certainly set an enviable lead for the newer camps. Tonopah is just entering upon her period of greatest prosperity.

A heavy production has been made, and is being made by the mines of Tonopah. Large dividends are being paid by her companies. Her leading company has itself financed a railroad, and the railroad has the reputation of paying for itself every six months. So far the production of Tonopah mines has consisted of smelting, every pound of which has been shipped to Salt Lake City, Denver or San Francisco. One dinky mill was used by the leasers on the oxidized surface ores in the earliest days.

Now they are building huge mills to handle the lower grade product, and there is available for these plants, ore to the value of hundreds of millions of dollars. The output of Tonopah

\$5,000

Will buy now one of the best vacant corner lots on South Temple Street. It faces 3 rods south front on Brigham Street, by 10 rods East front on U Street. Terms to suit purchaser.

Have You Counted

The new buildings in course of construction of just completed 3rd South Street and West Temple Streets. They are greater in number and in value than any other street in Salt Lake City. And more are to come.

We are agents for several pieces of business and prospective business property on 3rd South Street. The time to buy is before prices advance. Later you will wonder why you didn't see it. No trouble to show property or to quote prices to those who mean business.

Rooms 512-513 Templeton Building. Phone—Bell 57.

mines is going to be increased many times what it has been; a larger force of workmen is going to be employed; the future promises splendidly for this camp. I reiterate, Tonopah is just entering upon its period of greatest prosperity.

Three railroads are headed for the Bullfrog district, and they are after business. This district is referred to as the large mining district of the new Nevada. Just as soon as the railroad reaches the camps, and hauls in huge mining and milling plants, there will be a large mill in camp, the mines are capable of producing very rich ore.

One mine alone in this camp, the Montgomery Shoshone, is preparing a shipment which will be worth anywhere up to a million of dollars.

There is a district of proportions, which has mine after mine systematically and elaborately developed, with immense reserves of ore ahead, and which will produce for years.

Manhattan and Fairview are the two next of the popular camps, and splendidly promising camps they are, judging from their tremendous surface showings, and the comparatively small amount of work accomplished.

DUGWAY DISTRICT BUSY.

Utah Mine Management Meeting With Encouraging Conditions.

Word has been received in Salt Lake to the effect that the property of the Utah Mining company, with properties in the Dugway district is just at present meeting with excellent success. The entire face of the tunnel is now penetrating ore of fine grade said to be identical in appearance with that encountered 30 feet further back in the tunnel which carried as high as 20 per cent copper in addition to some lead and silver.

The company is made up mostly of Salt Lake men to whom the above will be welcome news. The entire district is said to be experiencing quite a little boom at present and several companies have recently encountered good ore.

MINING IN NEVADA.

Proto Parties Secure Ground Sixty Miles From Caliente.

Special Correspondence.

Proto, Oct. 29.—Ellis Maxfield, who brought in ore from the new property located by himself and Wm. Brinton, of Salt Lake, 60 miles west of Caliente, Nevada, for a smelter test, has returned from Salt Lake, but has not yet received returns from the ore. He, however, received returns today from an assay of ore taken from a later location than the one from which the large lot of ore was taken. This shows 172 oz. silver, 32 per cent lead and 5 per cent copper. Judging from the appearance of the ore brought for a smelter test, that should bring much better returns.

The district which Mr. Maxfield is operating is the old Hiko district, Lincoln county. There was considerable chondriling going on there in the early days and a smelter was built there, but abandoned when the price of silver dropped. The district is now again attracting attention, and one company which is operating on a large scale camp, has been prospecting for silver, for the reduction of their ore, or a smelter. Mr. Maxfield also believes that a railroad will be built into the district before long. At present the wagon haul of 60 miles to Caliente is a drawback, but in spite of this he believes his company can ship ore at a profit. He will return to the camp in a few days, prepared to conduct a vigorous campaign of development.

CONCENTRATES.

J. F. Gibbs the well known mining man of Marysville is in the city en route from Omaha to his home.

William Sproule, general manager of the American Smelting and Refining Co., of New York is at present in the city on his way to California.

Ed. Hoffman was in the city yesterday.

day. He spent today in Bingham looking over the properties in which he is interested there.

C. C. Thompson, superintendent of the Frisco Contact, was in the city last week attending a meeting of the board of directors of the Horn Silver and Copper Mining company.

LOCAL MARKETS.

In today's local markets the receipts include cars of lemons, bell flower apples and bananas from the coast, several cars of Irish
